Professional Summary

B.Tech CSE graduate with hands-on experience building serverless applications on AWS, including a production voting platform that served 500+ students and a cloud-native accommodation platform with 41 Lambda functions and 35+ UI components. Skilled in Lambda, API Gateway, DynamoDB, CloudFormation, and GitHub Actions CI/CD. Seeking an entry-level Cloud / DevOps Engineer role to apply AWS-native and IaC skills in a production environment.

Technical Skills

Cloud Platforms: AWS (Lambda, S3, DynamoDB, API Gateway, IAM, CloudFront, CloudFormation, CloudWatch, Cognito)

IaC & Automation: CloudFormation, Python Boto3 / AWS SDK, Bash

CI/CD & DevOps: GitHub Actions, Git, Linux, Docker

Networking: VPC, IAM Policies, Least-Privilege Access, TCP/IP, DNS

Programming: Python, JavaScript, Shell Scripting, REST APIs

Projects & Applied Experience

Dorm & Dish - Cloud-Based Student Accommodation Platform | GitHub

2026

Role: Backend Engineer (Team of 5)

Lambda (Node.js 18+), API Gateway, DynamoDB, S3, CloudFront, CloudFormation, Cognito, Google Maps API

- Contributed to a serverless multi-tier platform on AWS with 41 Lambda functions, 7 DynamoDB tables, and 35+ UI components, with projected significant hosting cost reduction compared to traditional EC2 deployments.
- Provisioned infrastructure as code via modular CloudFormation stacks, enabling single-command environment deployments.
- Implemented S3 presigned URL upload flow and CloudFront CDN for image delivery.
- Configured CloudWatch alarms for Lambda error rates and API latency to monitor production health.

Serverless Cloud-Based Voting System | GitHub

2025

Role: Project Lead & Frontend Developer (Team of 4)

React, Lambda (Python), IAM, DynamoDB, Cognito, CloudWatch, S3, GitHub Actions

- Led a team of 4 to build a digital voting platform that replaced the college's chit-based system, serving 500+ students in a live election.
- Engineered a GitHub Actions CI/CD pipeline, reducing manual deployment steps from 8 to zero.
- Built the React frontend with interactive candidate cards, animated results, and WCAG 2.2 accessibility compliance.
- Secured application access via Cognito User Pools, enforcing IAM least-privilege policies across all Lambda execution roles.

Education

B.Tech (CSE) – 7.4

2022 – 2026

Rajiv Gandhi College of Engineering, Research and Technology, Chandrapur, MH

Certifications & Training

- AWS Cloud Practitioner Essentials (AWS Skill Builder, Training) | Jun 2026
- Microsoft Azure Fundamentals (Microsoft Elevate & AICTE, 25 Hours Training) | Jan–Feb 2026
